

HemoCue® Hb 301 System

Optimized for anemia screening in primary care and blood donation settings. The HemoCue Hb 301 System provides quick, easy access to lab-quality results without compromising accuracy, even in demanding climates with high temperatures and humidity.

HemoCue WBC DIFF System

With groundbreaking technology, the HemoCue WBC DIFF makes it possible to get not only lab-accurate white blood cell counts but also five-part differentials at the point of care. In just five minutes, you have accurate counts for neutrophils, lymphocytes, monocytes, eosinophils and basophils.

Fitting seamlessly into a variety of clinical applications and even remote field clinics, the benefits are clear. Immediate WBC DIFF counts can mean the difference between waiting and taking action at the point of care — helping you move from assessment to treatment within minutes rather than hours or days.

HemoCue 201+ System

Has become a standard in hemoglobin point-of-care testing. Healthcare providers around the world rely on the immediate results so they can make the right decisions when they need them most.
